Subject: Comments on Microsoft Settlement

The Government settlement with Microsoft was very disturbing as a strong indication of the DOJ failure to protect the public interest in favor of the political interest. This settlement obviously ignores the vast body of evidence developed previously by DOJ against Microsoft. Respect for the even-handed application of the Law by DOJ will only be diminished in the public eye. This is very unfortunate during these critical times. I have no connection with Microsoft or any other high-tech company and am only an unfortunate user of Microsoft Windows doing the quality control work by actual use that properly should have been done by Microsoft prior to release of their inadequately tested and poor security products. The DOJ settlement will not correct these practices by permitting the continued monopoly of Windows and Office. Sincerely, Sidney Moglewer, 1866 Forest View, Prescott, AZ 86305.
